END

Hello everyone, pectoriah here once more!

This was a very challenging project for me, but one I knew I had to do justice. I hope it met your expectations! I tried to add lots of things I found lacking in size and futa stories, and even things I had never seen done before. Despite all this there were many ideas I had to scrap because the page count kept going up!

Once again I must express my gratitude to masough whose writing talents helped me immensely, and of course OniOniOgre of whom Anima would never exist at all otherwise! Also there are many influences from other artists that I must thank for inspiration. And last but not least thank you for reading this doujin! Please enjoy the guest pics on the following pages!

Sophia, Omnipotent Succubus

Sophia is an ascended succubus. After being summoned incorrectly, she completely absorbed and destroyed the entire reality she came in from. She now goes from one reality to another seeking pleasure and amusement, while growing infinitely more powerful the whole time.

Anima, The Devourer Chimera

Once the heir to the demonic throne, Anima is exiled to another dimension through political betrayal, where her royal succubus powers fuse with a chimeric essence, mutating into an infinite force of absorption. After consuming the dimension and its gods to become omnipotent, she returns home, only to find conquest dull—and begins seeking something capable of thrilling her again.
